### Product Description

#### Enhanced productivity & security

Dual storage options and Intel UHD graphics contribute to enhanced productivity. Integrated firmware (Trusted Platform Module v2) keeps your work secure by encrypting data and passwords.

The contemporary design of this sleek, Iron Grey laptop gives it a premium look and feel and its slim build makes carrying it when you're not in the office a breeze. The 14" screen displays colours beautifully and gives clarity to videos, images, and text.

#### Extreme dependability

Lenovo tested this laptop for reliability and durability under eight extreme conditions: shock test; vibration test, keyboard in-system test, hinge life test, fan reliability test, panel scuff test, operating temperature test, and pressure test.

It's ready for whatever conditions your business can put it through.

#### Ready to Get To Work

Factory installed Windows 10 Pro is ready to run your office applications, browsers and the security software of your choice. Windows 10 includes Microsoft's voice assistant, Cortana, provides voice control and search to do some work for you. Integrate Cortana with your calendar and you can even search by when and whom you worked on a file with rather than having to remember file names.
